## Our Houses

---

City living in Brisbane and Seoul

---

Brisbane and Seoul are cities that are both experiencing rapid growth and change. Go behind the scenes to learn how two architects have kept pace when designing new houses in this challenging yet opportunity-rich time.

Brisbane-based architect **JUSTIN O'NEILL** of **O'NEILL ARCHITECTURE** will present a local example of providing a home with privacy and tranquility in the midst of an increasingly crowded neighbourhood.

Architects **SOJUNG LEE** and **SANGJOON KWAK** of Korean-based practice **OBBA** will share the story behind Open and Closed House in Seoul, a new dwelling that sits in the context of accelerating commercialization and elevating land value.
