## Keynote Addresses.

### Pedagogic, economic and cultural trends currently shaping UK university design

Presented by Ian Goodfellow, Partner,  
Penoyre & Prasad

Ian Goodfellow is a partner at the architectural practice Penoyre & Prasad and deputy chair of the UK charity Higher Education Design Quality Forum, which promotes high-quality design in university campuses and buildings. Ian will give an overview of how changes in pedagogy and wider economic and cultural trends are currently shaping UK university design, and the research being undertaken by the Higher Education Design Quality Forum to assist universities and designers to respond to these changes.

### TAFE and university: differences in design

Presented by Ruth Wilson, Director,  
Architectus

Ruth Wilson is a director at Architectus. With 25 years of experience in Australia and Europe across a wide range of client groups, Ruth has worked on projects including St Michael's Grammar Allan Pizzey Building, Australian Synchrotron, and the Monash Victorian College of Pharmacy. The overriding theme in all Ruth's work is the focus on the human experience of the people using the buildings and her belief that through good design we have the opportunity to enhance and improve people's lives.

## Keynote Addresses.

### Nordic educational architecture and virtual learning spaces

Presented by Karl-Martin Buch Frederiksen, Partner, KANT

Karl-Martin Buch Frederiksen, partner and architect at KANT architects in Denmark, will present different built education buildings done by KANT; tell about future projects and about how we do educational buildings in Scandinavia.

We are standing towards a paradigm change in the Nordic educational architecture. In these years, the virtual learning space has entered the stage and has become a direct extension of the classical classroom. By working with future scenarios on learning and by continuing our accumulated knowledge about learning spaces, it is Karl-Martin's vision to believe that the new waves can have a conducive effect on both our behavior, well-being and learning ability.

In Scandinavia, we have a welfare model that makes it possible to challenge and rethink the way we learn. How we can challenge and rethink the Scandinavian education model will be one of the key topics of this presentation.

### Campus planning and design

Presented by Julie Wells, Vice President, Strategy and Culture, The University of Melbourne

Universities are among the most significant property developers in Australia, and actively shaping the cities and communities they inhabit. Increasingly, they are focused on leveraging the strategic value of their estate: in terms of the quality of their student and staff experience, for example, or through infrastructure which is designed to foster collaboration through co-location with partners in research and education. With limited funding available for capital, universities are also seeking new and creative ways to fund their capital investment, and to better realise its financial value. This address will use these themes to explore the external and internal forces which are shaping our thinking and our business models in relation to campus planning and design, drawing on examples from the University of Melbourne.

## Keynote Addresses.

### Pedagogy, structure and politics in education design

Presented by Pasi Sahlberg, Professor of Educational Policy, deputy director, Gonski Institute for Education, School of Education, UNSW Sydney

Pasi Sahlberg has worked as schoolteacher, teacher-educator, researcher and policy advisor in Finland and has analysed education policies and advised education policymakers around the world. He has gained working knowledge in over sixty countries, as a former senior education specialist at the World Bank in Washington, DC, lead education specialist at the European Training Foundation, director general of the Ministry of Education in Finland, and a visiting professor at Harvard University.

## Other Talks.

### Vertical daycare centres

Presented by Andrew Burges, Principal,  
Andrew Burges Architects

Andrew's work in practice as principal of ABA has been published extensively and exhibited both locally and internationally, including the 2008 Venice Biennale, and the 2005 'Out From Under: Contemporary Australian Architecture Now', exhibition in San Francisco, Seattle, Hong Kong and China.

### Inner City North State Secondary College, Brisbane

Presented by Christina Cho,  
Director, Cox Architecture

Christina Cho will present Fortitude Valley State Secondary College, the Queensland government's first vertical school. The project's inception required extensive research, diverse stakeholder input and new pedagogical thinking to develop both the educational brief and a shared set of design principles for a new educational typology.

The site in the Fortitude Valley has a rich education history, which has been drawn upon and interpreted in the design of the new secondary college; built environments that endure and are cherished by future generations reflect and respond to the unique stories of their place in our cities.

## Other Talks.

### Northcote High School Performing Arts Centre

Presented by Kerstin Thompson,  
Principal, Kerstin Thompson Architects

Kerstin Thompson is principal of Kerstin Thompson Architects (KTA), professor of design in architecture at Victoria University of Wellington (NZ) and adjunct professor at RMIT and Monash Universities. In recognition of the work of her practice, contribution to the profession and its education Kerstin was elevated to Life Fellow by the Institute in 2017. The practice focus is on architecture as a civic endeavour, with an emphasis on the user's experience and enjoyment of place.
