Program Info

Architecture can be a catalyst for transformation at all scales. The Architecture Symposium: Beyond the Building, Sydney presents a curated selection of contemporary Australian architects whose public projects have an impact that is beyond the built form itself. In these buildings, form and use, aesthetics and technology, concept and program, ethics and immediacy, private need and public good often meet head-on. Discussion will highlight works that have synthesized these often-conflicting factors, extending the brief to unlock remarkable results that have a ripple effect on the building's context and its community.
