

Design Speaks.

Health Care / Health Design Session 2 – All Together Now: Designing for Community

17 June 2021

LEARNING OUTCOMES

Participants who attend Health Care / Health Design 2021 – Session 2 will be able to:

- Consider the role architecture can play in creating healthcare environments that are embraced by the communities they serve. AACA Competency: Design; Schematic Design: 4.2
- Compare case study health care projects that engage with the community in a meaningful way. AACA: Competency: Design; Conceptual Design: 3.2
- Recall specific consultation processes that can improve community perceptions of a health care facility. AACA Competency: Design; Project Briefing 1.7

FORMAL ASSESSMENT

- Identify three common barriers to designing health care facilities that are “community centric.”
- Identify a specific speaker that challenged you to think differently about designing health care facilities for community
- What are some of the specific considerations needed for designing health care facilities for Indigenous communities?
- What is an example of a design strategy that was undertaken in an international context and could be explored and adapted to an Australian context?
- Describe some of tensions and possibilities that come with combining a range of health care services at one site.
- Were there any issues raised in this session that you feel require further exploration?

NOTE:

Following completion of the symposium and when your attendance is verified by the platform’s analytics, you will be emailed your attendance certificate(s). This is not an automated process, so please allow time for these to be issued. For delegates who will be viewing sessions on demand, after the live dates, certificates will not be issued until after 26 July 2021.
