

Design Speaks.

Health Care / Health Design Session 3 – Frame of Mind: Designing for Mental Health

22 June 2021

LEARNING OUTCOMES

Participants who attend Health Care / Health Design 2021 – Session 3 will be able to:

- Identify ways in which poorly designed healthcare spaces can exacerbate patient anxiety and stress; and, conversely, understand how architecture that takes into account mental health can lead to improved health outcomes.

AACA Competency: Design; Schematic Design: 4.2

- Compare case study health care projects that are designed for better mental health outcomes.

AACA Competency: Design, Conceptual Design 3.3

- Recall research from leading scholars investigating behavioural, affective and psychological reactions to the physical environment.

AACA Competency: Design; Schematic Design: 4.4

FORMAL ASSESSMENT

- Identify three ways in which architecture might be able to support mental wellbeing within healthcare environments.
- Identify a specific speaker that challenged you to think differently about designing for mental health.
- What are some of the challenges involved in integrating best-practice design for mental wellbeing into different health care environments?
- Give an example of a design strategy discussed in this session that could be adapted to other types of health care environments.
- Describe an area of research covered in this session that is relevant to your own practice. How is it relevant?
- Were there any issues raised in this session that you feel require further exploration?

NOTE:

Following completion of the symposium and when your attendance is verified by the platform's analytics, you will be emailed your attendance certificate(s). This is not an automated process, so please allow time for these to be issued. For delegates who will be viewing sessions on demand, after the live dates, certificates will not be issued until after 26 July 2021.
