

Design Speaks.

# Health Care / Health Design Session 4 – Urgent Attention Required: Designing for Crisis

24 June 2021

## LEARNING OUTCOMES

Participants who attend Health Care / Health Design 2021 – Session 4 will be able to:

- Interrogate how the design of healthcare buildings – and the built environment more broadly – can influence outcomes in emergency or crisis scenarios. AACA Competency: Design; Conceptual Design: 3.3
- Compare case study health care projects that are designed for moments of high intensity and emergency. AACA: Competency: Design; Detailed Design: 5.1
- Recall research into the built environment response to COVID-19 in the health care sector.

Competency: Design; Schematic Design: 4.4

## FORMAL ASSESSMENT

- Identify three ways in which architecture can influence health care outcomes in emergency situations.
- Identify a specific speaker that challenged you to think differently about designing for emergency/crisis.
- What is one way that COVID-19 might change the way health care facilities are designed?
- Give an example of a design strategy discussed in this session that could be adapted to an Australian context.
- Describe an area of research covered in this session that is relevant to your own practice. How is it relevant?
- Were there any issues raised in this session that you feel require further exploration?

## NOTE:

Following completion of the symposium and when your attendance is verified by the platform's analytics, you will be emailed your attendance certificate(s). This is not an automated process, so please allow time for these to be issued. For delegates who will be viewing sessions on demand, after the live dates, certificates will not be issued until after 26 July 2021.
