- Compare two processes, shared in this symposium, that negotiated political forces with existing and emerging local movements. What were the differences in approach and resolution to the challenges faced in the process.

- Recall a speaker from this symposium that made you think differently about the role of the architect in urban development. Explain why they made you think differently.

- Consider the advantages and disadvantages of specifying local materials and building with less. How do architectural design choices and specification on a project impact the social, environmental and economic health of a regional town or non-capital city?

- Describe how the material presented in this symposium will directly influence your design thinking and practice.

- Were there any issues raised that you feel require further discussion or exploration?
