

Design Speaks.

The Architecture Symposium: Out of Office

Friday, 11 October 2024

LEARNING OUTCOMES

Participants who attend The Architecture Symposium: Out of Office on Friday 11 October 2024 will be able to:

- Evaluate methods of collaborative communication through the design and construction process and identify which method is appropriate per project.
AACA Competencies (2021 NSCA): Practice Management and Professional Conduct; PC11, PC13. Project Initiation and Conceptual Design; PC22. Detailed Design and Construction Documentation; PC41.
- Identify challenges in the design and construction process in Australia and consider possible solutions.
AACA Competencies (2021 NSCA): Project Initiation and Conceptual Design; PC19, PC20.
- Draw on material research and material application presented in the symposium.
AACA Competency (2021 NSCA): Project Initiation and Conceptual Design; PC28.
- Speculate on how the practice of fabrication and making develops material and construction literacy.
AACA Competencies (2021 NSCA): Project Initiation and Conceptual Design; PC18, PC25.
- Develop an expanded understanding of how collaborative and respectful working relationships between architects, consultants, builders and trades can lead to projects that are environmentally and economically responsible.
AACA Competencies (2021 NSCA): Practice Management and Professional Conduct; PC11. Project Initiation and Conceptual Design; PC35. Detailed Design and Construction Documentation; PC43.

FORMAL ASSESSMENT

- Recall three examples presented in the symposium that demonstrate the application of “waste” materials.
- List two challenges that may limit innovative construction and material research on site in Australia. How could these barriers be overcome?
- Recall a speaker from this symposium that made you think differently about the role of the architect. Explain why they made you think differently.
- Consider how open conversation on site can lead to new design possibilities that provide solutions to the many environmental, technological and economic challenges we face today.
- Describe how methods of demolition, fabrication and communication shared in the symposium could be integrated into your architectural processes.
- Were there any issues raised that you feel require further discussion or exploration?

NOTE: Attendance certificates will be issued via email from 16 October 2024.
